

# High-resolution precision balance with removable display for maximum flexibility

## Features

- Laboratory balance with separate platform: Ideal when working in the glove bag or fume cupboard. Particularly practical for weighing toxic, volatile or contaminated substances
- **PRE-TARE function** for manual subtraction of a known container weight, useful for checking fill-levels
- Freely programmable weighing unit, e.g. display direct in special units such as length of thread g/m, paper weight g/m<sup>2</sup>, or similar
- Level indicator and levelling feet for precise levelling of the scale, fitted as standard, to give the most accurate weighing result
- **II Draught shield** standard for models with weighing plate size **II**, weighing space W×D×H 146×146×80 mm
- **Protective working cover** included with delivery

## **Technical data**

- Large backlit LCD display, digit height 21 mm
- Dimensions weighing surface
  Ø 105 mm
- B W×D 160×160 mm
- Weighing plate material
  I plastic, with conductive lacquer
  I stainless steel
- Dimensions of display device W×D×H 140×46×75 mm
- Optional battery operation, 9 V block not included, operating time up to 12 h, AUTO-OFF function to preserve the battery
- Overall dimensions W×D×H 165×280×75 mm
- Cable length of display device approx. 1,2 m
- Net weight approx. 1,2 kg
- Permissible ambient temperature 5 °C/35 °C

#### Accessories

- **Protective working cover** over the display device, scope of delivery: 5 items, KERN PCD-A05S05
- Stand to elevate display device, height of stand approx. 250 mm, KERN PCD-A03
- Rechargeable battery pack internal, operating time up to 24 h without backlight, charging time approx. 10 h,
- S Foot switch, ideal when the application requires two free hands. TARE or PRINT function can be selected. Scope of delivery: foot switch, junction box, connection cable. For the PRINT function you will need the RS-232 interface cable, KERN YKF-01 KERN PCD-A04
- **RS-232/Ethernet adapter** for connection to an IP-based Ethernet network, KERN YKI-01
- Individual header data: the free software can be used to print 4 header lines on the printout when using printers 911-013, YKN-01, YKB-01N, YKE-01 and YKC-01 (in combination with YKI-02)
- Further details, plenty of further accessories and suitable printers see *Accessories*

Internal adjusting: Quick setting up of the balance's accuracy with internal adjusting weight(motordriven)

Adjusting program CAL: For quick setting up of the balance's accuracy. External

adjusting weight required Memory: Balance memory capacity, e.g. for article data, weighing data, tare weights,

PLU etc. Alibi memory: Secure, electronic archiving of weighing results, complying with the 2014/31/EU standard.

Data interface RS-232: To connect the balance to a printer, PC or network

RS-485 data interface: To connect the balance to a printer, PC or other peripherals. Suitable for data transfer over large distances. Network in bus topology is possible

USB data interface: To connect the balance to a printer, PC or other peripherals

Bluetooth\* data interface: To transfer data from the balance to a printer, PC or other

WLAN data interface: To transfer data from the balance to a printer, PC or other

peripherals

To connect relays, signal lamps, valves, etc. Interface for second balance: For direct

connection of a second balance

((**†**)))

scale to an Ethernet network

Network interface: For connecting the

Wireless data transfer: between the weighing unit and the evaluation unit using an integrated radio module

KERN Communication Protocol (KCP): It KCP is a standardized interface command set for PROTOCOL KERN balances and other instruments, which allows retrieving and controlling all relevant parameters and functions of the device. KERN devices featuring KCP are thus easily integra ted with computers, industrial controllers and other digital systems

# KERN – Precision is our business

To ensure the high precision of your balance KERN offers you the the appropriate test weight in the international OIML error limit classes E1-M3 from 1 mg - 2500 kg. In combination with a DAkkS calibration certificate the best pre-requisite for proper balance calibration.

The KERN DAkkS calibration laboratory today is one of the most modern and best-equipped DAkkS calibration laboratories for balances, test weights and forcemeasurement in Europe.

Thanks to the high level of automation, we can carry out DAkkS calibration of balances, test weights and force-measuring devices 24 hours a day, 7 days a week.

Range of services:

- DAkkS calibration of balances with a maximum load of up to 50 t
- DAkkS calibration of weights in the range of 1 mg 2500 kg
- · Volume determination and measuring of magnetic susceptibility (magnetic characteristics) for test weights
- · Database supported management of checking equipment and reminder service Calibration of force-measuring devices
- DAkkS calibration certificates in the following languages DE, GB, FR, IT, ES, NL, PL
- · Conformity evaluation and reverification of balances and test weights

GLP/ISO log: The balance displays serial GLP number, user ID, weight, date and time, INTERN regardless of a printer connection

GLP/ISO log: With weight, date and time. GLP Only with KERN printers PRINTER

Piece counting: Reference quantities selectable. Display can be switched from piece to weight

Recipe level A: The weights of the recipe ingredientscan be added together and the total weight of the recipe can be printed out RECIPE

Recipe level B: Internal memory for complete recipes with name and target value of the recipe ingredients. User guidance through display

Recipe level C: Internal memory for complete recipes with name and target value of the recipe ingredients. User guidance through display, multiplier function, adjustment of recipe when dosages are exceeded or barcode recognition

Totalising level A: The weights of similar items can be added together and the total can be printed out

Percentage determination: Determining % the deviation in % from the target value 00 % PERCENT

Weighing units: Can be switched to e.g. nonmetric units at the touch of a key. See balance model. Please refer to KERN's website for more details

Weighing with tolerance range: (Check-weighin) Upper and lower limiting can be programmed individually, e.g. for sorting -√+ ⊙ 🤊 ୬ TOL and dosing. The process is supported by an audible or visual signal, see the relevant

M-Hold function: (Animal weighing program When the weighing conditions are ustable, a MOVE stable weight is calculated as an average value

Protection against dust and water splashes IPxx: The type of protection is shown in the pictogram.

Stainless steel: The balance is protected against corrosion INOX

Suspended weighing: Load support with hook on the underside of the balance

Battery operation: Ready for battery E operation. The battery type is specified BATT for each device

Rechargeable battery pack: Rechargeable set

Mains adapter: 230V/50Hz in standard version for EU. On request GB, USA or AUS 230 V

version available

Power supply: Integrated in balance. 230V/50Hz standard EU. More standards e.g. GB, USA or AUS on request

Weighing principle: Strain gauges Electrical resistor on an elastic deforming body

Weighing principle: Tuning fork A resonating (((**U**))) body is electromagnetically excited, causing it T-FORK to oscillate

Weighing principle: Electromagnetic force compensation Coil inside a permanent FORCE magnet. For the most accurate weighings

Weighing principle: Single cell technology Advanced version of the force compensation principle with the highest level of precision

verification is specified in the pictogram

Μ +3 DAYS

> DAkkS calibration possible (DKD): The time DAkkS required for DAkkS calibration is shown in +3 DAYS days in the pictogram

Verification possible: The time required for

Package shipment: The time required for internal shipping preparations is shown in days in the pictogram

Pallet shipment: The time required for inter nal shipping preparations is shown in days in the pictogram
