

UniExM.

Technical data:

- This device offers a wide range of standardized models regarding connection, mounting, material and function
- Up to 2 switching points for N.C. contact, N.O. contact or changeover contact
- Temperature switch or temperature sensor is optionally possible

Our devices of the UNIEX M series may only be operated in connection with an Ex barrier / switch amplifier.

Application:

- Use of devices in almost all kind of fluids
- Measurement of liquid level for shipbuilding, off-shore, chemical and petrochemical industry, machinery and plant engineering, hydraulic power packs, cooling systems, potable water treatment, food and beverage industry, stirring and process technology, power plants and other power systems
- Due to the compact design the mini-float switches are particularly suitable for areas like small tanks and system monitoring
